

My name is Yegor, I am from Ukraine and there is a war in my country now – we were treacherously attacked by neighboring Russia
I, like every Ukrainian, want to help my army win faster!

On April 12, the postage stamp “Russian warship, go..” was published in Ukraine, which became an event for the whole country.

The stamp features a Ukrainian soldier showing gray to the Russian cruiser Moskva.

And two days after the release of this brand of the ship, the flagship of the Russian fleet, was especially noted by the military in the Black Sea, which became an important event in history!

Thus, this one instantly instantly became a cult and was instantly sold out)

My friends and I stood in a long queue to buy some blocks of stamps, and now I want to build the original sale, and with the proceeds I can buy something necessary for our military, for example, a thermal imager

Price per stamp \$100

When buying a stamp sheet (6 stamps) – \$600.

I want to know more about my mother, who is engaged in crafts and also wants to help the country and the army by selling her products, transferring part of the proceeds from sales!

We are sure that you or your friends like her textile handbags!

Share this information with your friends)

Glory to Ukraine!!!
